

**H.R. 3962 and H.R. 3590
Health System Reform
Legislative Summary Chart
of Major Provisions
December 2, 2009**

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Health Insurance Market Reforms	<p>Establishes new federal health insurance standards in individual and small group markets (most effective in 2013): bans coverage exclusions of pre-existing health conditions or rating or coverage restrictions based on health status; requires guaranteed issue and guaranteed renewability, and modified community rating, with limited premium variation allowed based only on age (2:1), geographic area, and family size. Imposes federal standards regarding network adequacy and requires minimum medical loss ratios. No annual or lifetime limits allowed. Requires health plans to allow young people to remain on their parents' insurance policy up to their 27th birthday. Allows states to enter into compact permitting sale of insurance across state lines when the state legislatures agree. National plans, with uniform benefit packages that are offered across state lines, are allowed. Sec. 211-217; 309</p> <p>Provides for immediate reforms in 2010 including: ending health insurance rescission abuse; requiring pre-implementation review of increases in health insurance premiums; elimination of lifetime limits; limits on pre-existing condition exclusions by group health plans in advance of new prohibition on pre-existing condition exclusions; and creation of a temporary national high-risk pool program with financial assistance for those who have been uninsured or denied a policy due to pre-existing conditions (expires when Exchange is operational). Also extends COBRA coverage for individuals until Exchange is running.</p>	<p>Establishes new federal health insurance standards in individual and small group markets: bans coverage exclusions of pre-existing health conditions or rating or coverage restrictions based on health status; requires guaranteed issue and guaranteed renewability and modified community rating, with limited premium variation allowed based only on age (3:1), geographic area, tobacco use, and family size. Requires health plans to allow young people to remain on their parents' insurance policy up to their 26th birthday. Requires insurers to report medical loss ratios and provide rebates. Interstate sale of insurance permitted; national plans, with uniform benefit packages that are offered across state lines, are allowed (with state opt-out). Title I, Subtitles A, C; Subtitle D, Sec. 1333.</p> <p>Provides for immediate reforms in 2010 including: a temporary high-risk pool with subsidized premiums for those with pre-existing conditions who have been denied health coverage and have been uninsured for at least six months; ending health insurance rescission abuse; standards for medical loss ratios to ensure that premiums are spent on health benefits, public disclosure of overhead and benefit spending by health insurance issuers, and premium rebates for insurers that exceed standards for overhead expenses; coverage of certain preventive health services without cost-sharing; ban on lifetime limits on benefits and restricting annual limits on benefits; and development of uniform explanation of coverage documents for</p>	<p>These provisions are generally consistent with AMA policy (e.g., Sub. Res. 203 and other policy) opposing pre-existing condition exclusions and supporting modified community rating, guaranteed issue in the context of an individual mandate, guaranteed renewability, insurer transparency regarding medical loss ratios, and ending rescission abuse.</p> <p>Provisions allowing the sale of health care insurance across state lines should clarify that state patient and provider protections are not preempted.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	Title I	enrollees. Title I, Subtitles A and B.	
Insurance Exchange	<p>Creates a national Health Insurance Exchange through which individuals not enrolled in acceptable coverage and small employers (beginning with 25 or fewer employees in Year 1, and phasing up to more than 100 employees in Year 4) can buy private coverage or a public health insurance option and which would be administered by a new independent federal agency, the Health Choices Administration. Only qualified health benefit plans (QHBP) meeting specific criteria could be sold in the Exchange. However, direct primary care medical home plans, with wrap-around coverage for catastrophic events, would be allowed to participate as QHBPs in Exchange. Insurers could offer plans outside the Exchange through employer and grandfathered plans, but new individual policies issued post-enactment could only be offered through the Exchange. Existing group plans would have to meet QHBP standards by 2018. Premium and cost-sharing credits would only be available within Exchange. Title III</p> <p>The HHS Secretary would establish a minimum benefits package with limits on cost sharing levels, based on recommendations from a Health Benefits Advisory Council that is chaired by the Surgeon General. Four plan benefit categories, with varying cost-sharing, would be offered through the Exchange. Sec. 221-224, 303.</p>	<p>By 2014, states must create state-based exchanges for the individual market and small business health options program (SHOP) exchanges for the small group market. States may be granted a waiver from HHS to opt-out from the exchange requirement if they provide coverage at least as comprehensive as that required under the Act. Only qualified health benefit plans (QHBP) meeting specific criteria could be sold in the Exchange. Insurers may sell policies outside the Exchange. Large employers would be phased into the exchanges beginning in 2017. Sec. 1311, 1312.</p> <p>Plans may not discriminate against any health care provider, acting within their state scope of practice law, that wants to participate in the plan, but plans are not required to contract with any willing provider. Sec. 1201.</p> <p>The HHS Secretary would establish a minimum benefits package with limits on cost sharing levels and four plan benefit categories. A separate catastrophic-only policy would be offered to those 30 years or younger, or to those without affordable coverage. Provides for child-only plans and stand-alone pediatric dental plans. Sec. 1302.</p> <p>Plans sold in the gateway are required to contract with hospitals that meet certain requirements, including the requirement that the hospital utilize a patient safety evaluation system as specified in the Patient Safety and Quality Improvement Act. Sec. 1311</p>	<p>Exchanges are generally consistent with AMA policy supporting mechanisms that assist consumers and employers in obtaining information about their available insurance options.</p> <p>The AMA has concerns, however, regarding the prescriptive nature of the requirements for benefits and benefit structures. The AMA supports using existing federal guidelines regarding types of health insurance coverage (e.g., Title 26 of the U.S. Tax Code and Federal Employees Health Benefits Program [FEHBP] regulations) to assess whether a given plan would provide meaningful coverage.</p> <p>AMA policy does not support the provision in the Senate bill that requires the utilization of a patient safety evaluation system. AMA policy supports voluntary reporting of patient safety events as established under the Patient Safety and Quality Improvement Act.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p><u>Appeals Process.</u> Health Insurers required to meet standards for timely internal grievance and appeals mechanisms and to establish an external review process that provides for an impartial, independent and de novo review of denied claims. The determination is binding. Sec. 232.</p>	<p><u>Appeals Process:</u> Health Insurers required to implement a process for appeals of coverage and determinations and claims. Sec. 1001.</p>	<p>The AMA supports strong appeal rights and a process that provides an internal and external process.</p>
Public Health Insurance Option/ CO-OPs	<p>The HHS Secretary would create and administer a new public health insurance option to be offered through the Exchange, beginning in 2013. Secretary could enter into no-risk contracts to administer public option. Must meet the same insurance market reforms, benefits requirements, consumer protections, and provider network requirements as private plans in the Exchange. Must offer three cost-sharing options and vary premiums geographically, with contingency margin. Financing through start-up funding to be repaid, and then self-sustaining through revenues from premiums. Sec. 321</p> <p>Secretary must negotiate payment rates with providers so that rates in aggregate would not be lower than Medicare rates and not higher than the average rates paid by private plans in Exchange. Medicare providers are presumed to be participating in public plan unless they opt out. No penalties for opting out and physicians have at least one-year period prior to beginning of public plan to opt out. Secretary can develop conditions of participation. Allows two classes of participating physicians: preferred physicians, who agree to accept the PHIO's payment rate (without regard to cost-sharing) as payment in full; and participating non-preferred</p>	<p>Community Health Insurance Option (CHIO) would be offered through the state exchanges. Authorizes Secretary to contract out the administrative functions to one or more nonprofit entities. Physician and individual participation would be voluntary, with no penalties for non-participation. Requires Secretary to negotiate payment rates with physicians and other providers (rates that are not higher, in aggregate, than the average rates paid by private qualified health plans through the Exchange). Requires Secretary to set geographically-adjusted premium rates that cover expected costs (self-sustaining). Requires CHIO to be subject to all federal and state laws that apply to private health insurers relating to guaranteed renewal, rating, preexisting conditions, non-discrimination, quality improvement and reporting, fraud and abuse, solvency and financial requirements, market conduct, prompt payment, appeals and grievances, privacy and confidentiality, licensure, and benefit plan material or information (Level playing field). Requires the public plan to also be subject to a federal solvency standard to be established by the Secretary and state consumer protection laws. Sec. 1323, 1324.</p> <p>Creates the Consumer Operated and Oriented</p>	<p>The AMA does not believe a public option is necessary in a reformed insurance market that provides a choice of private plans.</p> <p>It is AMA policy (Sub. Res. 203) that insurance coverage options offered in a health insurance exchange be self-supporting, have uniform solvency requirements, not receive special advantages from government subsidies, include payment rates established through meaningful negotiations and contracts, not require provider participation, and not restrict enrollees' access to out-of-network physicians.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>physicians, who agree not to impose charges in excess of balance billing limitations set by the Secretary. Sec. 323, 325</p> <p>Authorizes Secretary to use innovative payment methods and modify cost-sharing to encourage the use of medical homes, accountable care organizations, value-based purchasing, bundling of services, partial capitation, direct contracting with providers, differential payment rates, and performance or utilization based payments. Sec. 324</p> <p>Requires the Health Choices Commissioner to make grants and loans to assist organizations that wish to establish not-for-profit, member-run health insurance cooperatives to provide insurance through the Exchange. Sec. 310</p>	<p>Plan (CO-OP) program to foster the creation of non-profit, member-run health insurance companies in all 50 states and District of Columbia to compete on a level playing field with the private market. To be eligible to receive funds, an organization must not be an existing organization, substantially all of its activities must consist of the issuance of qualified health benefit plans in each state in which it is licensed, governance of the organization must be subject to a majority vote of its members, must operate with a strong consumer focus, and any profits must be used to lower premiums, improve benefits, or improve the quality of health care delivered to its members. Grants would be provided to meet state solvency requirements. Ban on insurer or insurance industry involvement. No CO-OP can operate until state has implemented the individual and small group insurance market reforms required under the Act. Sec. 1322</p> <p>States would have option to establish a federally-funded, non-Medicaid state plan for people with incomes above Medicaid eligibility (133% of FPL) but below 200% FPL instead of providing such individuals with tax credits to purchase coverage through health insurance exchanges. States would negotiate contracts with health care systems (licensed HMOs, licensed insurers, or a network of health care providers) to provide services under the basic health plan. State Basic Health Plan administrators would negotiate payment rates and benefit packages and would seek to contract with managed care systems. Sec. 1331</p>	

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Individual Mandate	Beginning 1/1/13, requires most individuals to have “acceptable health coverage” or pay a penalty of 2.5% of their adjusted income above the filing threshold up to the cost of the average national premium for self-only or family coverage under a basic plan in the Health Insurance Exchange. Exceptions granted for those with incomes below the filing threshold (in 2009 the threshold for taxpayers under age 65 is \$9,350 for singles and \$18,700 for couples), religious objections and financial hardship. Sec. 401, 501	Requires most individuals to have minimum acceptable coverage or pay a tax penalty of \$95 for 2014, \$350 for 2015, \$750 for 2016, and indexed thereafter. Penalties for families are capped. Exemptions will be granted for those who cannot afford coverage, religious objectors, or if the individual has income below 100% of poverty. Sec. 1501	Generally consistent with AMA policy supporting personal responsibility, as long as subsidies/tax credits are sufficient to enable individuals to obtain affordable coverage.
Employer Requirements	Beginning 1/1/13, requires employers to offer coverage to their employees and contribute at least 72.5% of the premium cost for single coverage and 65% of the premium cost for family coverage of the lowest cost plan that meets the essential benefits package requirements or pay up to 8% of payroll into the Health Insurance Exchange Trust Fund. Employers that provide coverage but fail to meet minimum health coverage participation requirements are subject to a penalty tax. Small employers with payrolls under \$500,000 are exempt from the pay or play assessment; firms with payrolls between \$500,000 and \$750,000 subject to graduated penalty. Sec. 411-413; 511-512.	Requires an employer with more than 50 full-time employees that does not offer coverage and has at least one full-time employee receiving the premium assistance tax credit to make a payment of \$750 per full-time employee. An employer with more than 50 full-time employees that requires a waiting period before an employee can enroll in health care coverage will pay \$400 for any full-time employee in a 30-60 day waiting period and \$600 for any full-time employee in a 60-90 day waiting period. An employer with more than 50 employees that does offer coverage but has at least one full-time employee receiving the premium assistance tax credit will pay the lesser of \$3,000 for each of those employees receiving a tax credit or \$750 for each of their full-time employees total. The Secretary of Labor shall conduct a study to determine whether employees’ wages are reduced by reason of the application of the assessable payments. Sec. 1513	The AMA does not have policy on an employer mandate.

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Premium Subsidies to Individuals	<p>Provides advanceable, sliding scale affordability credits for premiums to eligible individuals/families with incomes up to 400% of FPL to purchase insurance through the Exchange. The credits limit individual family spending on premiums for the essential benefit package to no more than 1.5 % of income for those at the lowest incomes, and phase up to no more than 12% for those at 400% of FPL. In addition, cost-sharing subsidies would be provided on a sliding scale basis, based on six income tiers and phasing out at 400% of FPL. Sec. 341-347</p> <p>In general, employees who are offered employer coverage are not eligible for credits within the Exchange. In year two, employees who can show that coverage under their employer-provided plan would cost more than 12% of their income are eligible to go into the Exchange to choose a plan and apply for affordability and cost-sharing credits.</p>	<p>Provides refundable, advanceable, and sliding-scale premium credits to individuals and families with modified gross incomes up to 400% FPL to purchase coverage through the Exchange. The credit starts at 2% of income for those at or above 100% FPL and phasing out to 9.8% of income for those at 400% FPL. Also provides cost-sharing subsidies to eligible individuals and families with incomes between 100-400% FPL. Employees who are offered coverage by an employer are not eligible for premium credits unless the employer plan does not have an actuarial value of at least 60% or unless the employee share of the premium is 9.8% or more of income. Sec. 1401-1402.</p>	<p>Generally consistent with AMA policy supporting the provision of tax credits or subsidies to lower-income individuals to help them purchase health insurance.</p>
Premium Subsidies to Employers	<p>Small employers (up to 25 employees) that provide qualified health coverage to their employees would be eligible for a tax credit, up to 50 percent of aggregate coverage expenses. The credit phases out based on average compensation of employees, and no credit is allowed with respect to highly compensated employees (over \$80,000). Sec. 521</p>	<p>Provides a tax credit to small employers with no more than 25 full-time equivalent employees and average annual wages of no more than \$40,000 that purchase health insurance for their employees. Full amount of credit available only to employer with ten or fewer FTEs, with annual wages of less than \$20,000. To be eligible for tax credit, the employer must contribute at least 50% of the total premium cost or 50% of a benchmark premium. Sec. 1421</p>	<p>AMA policy prefers that tax credits or subsidies go to individuals, rather than employers, but supports initiatives to enable small employers to obtain affordable coverage for their employees.</p>
Expansion of Public Programs	<p>Expands Medicaid to all individuals under age 65 (children, pregnant women, parents, and for the first time, adults without dependent children) with incomes up to 150% FPL.</p>	<p>Expands Medicaid to all individuals under age 65 (including for the first time, adults without dependent children) with incomes up to 133% FPL. Income eligibility will be based on</p>	<p>AMA policy supports: maintaining and strengthening the safety net provided by Medicaid; basic national standards of uniform eligibility for all persons below the poverty line,</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>Maintains the traditional Medicaid benefits package. Provides Medicaid coverage for all newborns who lack acceptable coverage and provides optional Medicaid coverage to low-income HIV-infected individuals (with enhanced matching funds) until 2013 and for optional coverage of family planning services to certain low-income women. Increases Medicaid physician payment rates for primary care services to 100% of Medicare rates by 2012. Requires states to submit a state plan amendment specifying the payment rates to be paid under the state’s Medicaid program. The coverage expansions (except the optional expansions) and the enhanced provider payments will be financed with 100% federal financing through 2014 and 91% federal financing beginning in year 2015. States would be required to maintain eligibility levels with regard to beneficiaries currently enrolled in Medicaid (as of 6/16/09). Sec. 1701-1703; 1721</p> <p>Medicaid would be required to cover preventive services, as recommended by the U.S. Preventive Services Taskforce, and vaccines recommended by the Director of the Centers for Disease Control and Prevention. Tobacco cessation counseling for pregnant women would be covered, and tobacco cessation drugs would be covered for all beneficiaries. A medical home pilot program is created. Extends the current increase in FMAP under the Recovery Act to states with high unemployment rates. Sec. 1711, 1712, 1722, 1749.</p>	<p>modified gross income and income disregards and asset tests would no longer apply in most cases. Sec. 2001-2002</p> <p>Newly eligible adults will be guaranteed a benchmark benefit package that at least provides the essential health benefits. Requires states to provide premium assistance and wrap-around benefits to any Medicaid beneficiary with access to employer-sponsored insurance if it is cost-effective for the state. No provision to increase payment rates to physicians. Sec. 2001, 2003</p> <p>To finance the coverage for the newly eligible, states will receive 100% federal funding for 2014 through 2016. Beginning in 2017, financing for the newly eligible will be shared between the states and the federal government through an increase in the federal medical assistance percentage (FMAP). For states that already cover adults with incomes above 100% FPL (as of date of enactment), the percentage point increase in the FMAP will be 30.3 in 2017 and 31.3 in 2018. For all other states, the percentage point increase in the FMAP will be 34.3 in 2017 and 33.3 in 2018. Beginning in 2019, all states will receive an FMAP increase of 32.3 percentage points for the newly eligible. Sec. 2001.</p> <p>Maintenance of income eligibility required for all adults through 12/31/2013. For calendar years 2011 through 2013, state exemption available for MOE for optional non-pregnant non-disabled adult populations above 133% FPL if state has budget deficit or is projected</p>	<p>and the elimination of the existing categorical requirements, which would allow for the coverage of low-income individuals based solely on financial need; and setting Medicaid payment rates at a level that encourages widespread physician participation in the program. AMA policy supports the prevention provisions.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>Ends the Children’s Health Insurance Program (CHIP) at the end of 2013 and requires CHIP enrollees with incomes above 150% FPL to obtain coverage through the Health Insurance Exchange beginning in 2014. CHIP enrollees with incomes between 100% and 150% FPL would be transitioned to Medicaid and states would receive the CHIP enhanced match rate for children above current levels and up to 150% FPL. Requires a report to Congress with recommendations to ensure that coverage in the Health Insurance Exchange is comparable to coverage under an average CHIP plan and that there are procedures to transfer CHIP enrollees into the exchange without interrupting coverage or with a written plan of treatment. (Report due by December 31, 2011) Sec. 1703</p>	<p>to have deficit in next fiscal year. This requirement would be extended through 9/30/19 for all children currently covered in Medicaid or CHIP. Sec. 2001</p> <p>Maintains current CHIP structure. In FY 2014, through FY 2019, states to get a 23 percentage point increase in the match rate, with a cap of 100%. CHIP-eligible children who cannot enroll in CHIP due to federal allotment caps would be eligible for tax credits in the state exchange. Sec. 2101</p> <p>Covers only proven preventive services and provides incentives to Medicaid beneficiaries to complete behavior modification programs. Requires Medicaid coverage for tobacco cessation services for pregnant women, and for states that provide coverage for and remove cost-sharing for preventive services recommended by the US Preventive Services Task Force and recommended immunizations, provides a one percentage point increase in the FMAP. Sec. 4106, 4107. Allows states the option of covering family planning services for certain low-income women and providing community-based attendant supports and services to disabled individuals. Sec. 2303, 2401.</p> <p>Creates a new Medicaid state plan option to permit Medicaid enrollees with at least two chronic conditions, one condition and risk of developing another, or serious and persistent mental health condition to designate a provider as a health home. Sec. 2703</p>	

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Long-Term Care	<p>Creates a national, voluntary, long-term care insurance program to help purchase services and supports for people who have functional limitations, in order to help such individuals maintain personal and financial independence. (CLASS Program). Financed through voluntary payroll deductions; all working adults would be enrolled in the program, unless they opt out. Would supplement, not supplant Medicaid and/or private long-term care insurance. Sec. 2581</p>	<p>Creates a national, voluntary long-term care insurance program to help purchase services and supports for people who have functional limitations, in order to help such individuals maintain personal and financial independence (CLASS program). Financed through voluntary payroll deductions. Would supplement, not supplant Medicaid and/or private long-term care insurance. Sec. 8001-8002.</p> <p>Also creates the Community First Choice Option in Medicaid to provide community-based attendant supports and services to disabled individuals who require an institutional level of care. Provides states that undertake reforms to increase nursing home diversions and access to home and community-based services in their Medicaid programs with a targeted increase in their FMAP for 5 years. Sec. 2401-2402.</p>	<p>AMA policy supports Medicaid reform to provide services in the most appropriate settings based upon the individual's needs, and to provide equal access to community-based attendant services and supports. The AMA also supports investments in home and community-based services.</p>
Prevention/Wellness	<p>Develops a national strategy to improve the nation's health through evidenced-based clinical and community-based prevention and wellness activities. Create task forces on Clinical Preventive Services and Community Preventive Services to develop, update, and disseminate evidenced-based recommendations on the use of clinical and community prevention services. Improves prevention by covering only proven preventive services in Medicare and Medicaid. Creates a Prevention and Wellness Trust Fund, providing \$34 billion in mandatory funding over the next 10 years, for programs including community-based prevention and child obesity. Establishes a grant program to help small employers create or strengthen</p>	<p>Develops a national prevention and health promotion strategy that sets specific goals for improving health. Creates a prevention and public health investment fund, providing \$5 billion (cut from \$30 billion in HELP bill) in funding from 2010 through 2014 to expand and sustain funding for prevention and public health programs. Sec. 4001-4002.</p> <p>Permits insurers to create incentives for health promotion and disease prevention practices through significant premium discounts and encourages employers to provide wellness programs and provide premium discounts for employees who participate in these programs. Sec. 1001 (PHSA 2705), 4303. See more prevention provisions in Medicaid section.</p>	<p>The prevention and wellness provisions are generally consistent with AMA policy. However, regarding employee wellness programs, we are concerned that language in the Senate bill allowing employer-sponsored plans to provide significant premium discounts or other rewards (up to 50% of the cost of coverage) could allow discrimination against individuals based on their health status. AMA policy supports reward-based incentive programs to promote healthy lifestyles that reward behaviors, not health status. Incentives should be integrated into an ongoing risk-reduction and behavior change program to encourage and support long-term changes in habits and behaviors.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	workplace wellness programs. Title III		
Advance Care Planning	Provides for Medicare coverage of optional consultations between physicians and patients about advance care planning, every 5 years, beginning in 2011. More frequent consultations permitted if there is a significant change in the health of an individual. Patient participation is voluntary. Requires health insurers in the Exchange to provide enrollees with information about advance care planning. Prohibits the promotion of assisted suicide. Sec. 1233; 240	No provision on advance care planning. Prohibits discrimination against any individual or institutional health care entity receiving federal, state, or local government funding on the basis that the entity does not provide assisted suicide, euthanasia, or mercy killing. Sec. 1553.	Consistent with AMA policy supporting Medicare reimbursement to physicians for advance care planning consultations with their patients and with policies supporting the importance of such planning by all patients.
Comparative Effectiveness Research	<p><u>Center for Comparative Effectiveness Research.</u> Would establish a Center for Comparative Effectiveness Research in the Agency for Healthcare Research and Quality (AHRQ) within HHS.</p> <p><u>Governance:</u> HHS Secretary has ultimate authority; Commission appointed by U.S. Comptroller would serve as advisory body and membership required to include a representative of practicing clinicians.</p> <p><u>Use of CER Findings:</u> Would allow the Center to issue recommendation concerning practice guidelines, coverage, and policy, but would not be considered mandates.</p> <p><u>Dissemination.</u> Findings must be disseminated with consideration given standards and protocols of clinical excellence developed by relevant expert organizations that could include medical specialty societies.</p> <p><u>Personalized Medicine:</u> Provisions ensure CER supports the advancement of</p>	<p><u>Patient-Centered Outcomes Research Institute.</u> Would establish an independent non-profit CER institute tasked with supporting research on comparative clinical effectiveness.</p> <p><u>Governance:</u> Independent Board of Governors appointed by U.S. Comptroller would be responsible for all activities and would include physician representation.</p> <p><u>Use of CER Findings:</u> Would allow the institute to issue recommendations concerning practice guidelines, coverage recommendations, or policy, but prohibits construing recommendations as mandates.</p> <p><u>Dissemination:</u> AHRQ required to expand CER capacity through training grants for researchers, coordination of access to federal health care program data in order to build data capacity including support for clinical registries and health outcomes research data networks; AHRQ required to consult with medical and clinical associations</p>	<p>AMA policy supports establishing an independent entity responsible for comparative clinical effectiveness research with an established funding source and governance structure with central and substantial physician representation and participation to oversee and support CER.</p> <p>AMA policy opposes conferring the CER entity with authority to issue recommendations (or mandates) concerning practice guidelines, coverage, payment, or policy.</p> <p>AMA policy supports expanding CER capacity, including expansion of clinical registries and engagement of medical specialties to facilitate rapid consideration of CER findings for use by clinicians and specialties for their development of practice guidelines, protocols, and ultimately use.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>personalized medicine.</p> <p><u>Medicare National Coverage Determinations:</u> Research would not be used to make more stringent standards or otherwise change the standards or requirements for coverage of items and services under the health system reform legislation.</p> <p><u>Funding.</u> Trust Fund established with appropriated funds initially and subsequently with fees imposed on private and public insurers.</p> <p>Sec. 1401, 1802</p>	<p>and obtain regular, structured feedback to promote uptake of CER findings in clinical practice. AHRQ is prohibited in this capacity from issuing either mandates or recommendations concerning clinical guidelines, payment policy, or reimbursement policy.</p> <p><u>Personalized Medicine:</u> Provisions ensure CER supports the advancement of personalized medicine.</p> <p><u>Medicare NCD:</u> Would authorize the use of CER findings in Medicare NCDs, but prohibits HHS from using CER findings as the sole basis for such determinations and clarifies that the “reasonable and necessary” standard used to make NCDs is not modified by this legislation.</p> <p><u>FCC CER.</u> Disbands the Federal Coordinating Council for CER established by the American Recovery and Reinvestment Act of 2009 (ARRA).</p> <p><u>Funding.</u> Trust Fund established; \$100 million transfer of funds appropriated to HHS in the ARRA and annual fees from public and private health insurance companies. Funding will terminate in 2019.</p> <p><u>Methodology:</u> Would prohibit the utilization of methodology that discounts value of life because of a person’s disability.</p> <p>Sec. 6301, 6302</p>

	<p><u>Discount for Part D Drugs.</u> Requires drug manufacturers to provide a 50 percent discount to Part D beneficiaries for brand-name drugs and biologics purchased during the coverage gap beginning in 2010. Sec. 1182.</p> <p><u>Part D Negotiations:</u> Requires HHS Secretary to negotiate Part D drugs directly with manufacturers without establishing national formulary. Would allow plans to negotiate additional discounts or reductions in the price negotiated by the Secretary. Sec. 1186.</p> <p><u>Including costs incurred by AIDS Drug Assistance Programs and Indian Health Service</u> in providing prescription drugs towards the annual out-of-pocket threshold under Part D. Sec. 1184.</p> <p><u>Accurate dispensing in long-term care facilities.</u> Requires Part D plans to develop utilization management techniques to reduce prescription drug waste in long-term care facilities. Sec. 1187.</p> <p><u>Prohibits mid-year formulary changes.</u> Prevents Part D plans from making any formulary change that increase cost-sharing or otherwise reduce coverage once the plan marketing period begins. Sec. 1185.</p> <p><u>Free generic refill.</u> Clarifies that Part D plans may offer generic drugs to enrollees with zero copayment to encourage use of lower-cost generic drugs. Sec. 1188.</p>	<p><u>Discount for Part D drugs:</u> Requires drug manufacturers to provide a 50 percent discount to Part D beneficiaries for brand-name drugs and biologics purchased during the coverage gap beginning July 1, 2010. Sec. 3301.</p> <p><u>Including costs incurred by AIDS drug assistance programs and Indian Health Service</u> in providing prescription drugs toward the annual out-of-pocket threshold under part D. Sec. 3314.</p> <p><u>Accurate dispensing in long-term care facilities.</u> Requires Part D plans to develop drug dispensing techniques to reduce prescription drug waste in long-term care facilities. Sec. 3310.</p> <p><u>Improved Medicare prescription drug plan and MA–PD plan complaint system.</u> HHS to develop and maintain a plan complaint system to handle complaints regarding MA and Part D plans or their sponsors. Sec. 3311.</p> <p><u>Uniform exceptions and appeals process for prescription drug plans and MA–PD plans.</u> Requires Part D plans to use a single, uniform exceptions and appeals process. Sec. 3312.</p>	<p>program.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
		<p><u>Reducing part D premium subsidy for high-income beneficiaries.</u> Reduces the Part D premium subsidy for beneficiaries with incomes above the Part B income thresholds. Sec. 3308.</p> <p><u>Improving formulary requirements for prescription drug plans and MA–PD plans</u> with respect to certain categories or classes of drugs. Codifies the current six classes of clinical concern, removes the criteria specified in section 176 of MIPPA that would have been used by HHS to identify protected classes of drugs and gives the Secretary authority to identify classes of clinical concern through rulemaking. Sec. 3307.</p> <p><u>Elimination of cost sharing for certain dual-eligible individuals.</u> Eliminates cost sharing for beneficiaries receiving care under a home and community-based waiver program who would otherwise require institutional care. Sec. 3309.</p>	
Self-Referral Exception for Imaging	Requires HHS to conduct a study to evaluate the extent of physician self-referral arrangements and the effects of such arrangements on the cost of providing advanced diagnostic imaging and radiation oncology services to Medicare beneficiaries.	Referring physicians are required to notify patients in writing that in-office ancillary services for specified imaging services may be obtained from a person other than the referring physician. Sec. 6003.	AMA policy supports the in-office exception to the prohibition on self-referral.
Physician Data	Requires HHS Secretary to study the use of physician prescribing information in sales and marketing practices of manufacturers and make recommendations to Congress and HHS Secretary for action. Sec. 239	None	AMA policy supports the licensing for legitimate business purposes of physician prescribing data where physicians are provided the opportunity to opt-out of use.

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Medicare Payment/ SGR	SGR provisions moved to separate bill, H.R. 3961: repeals SGR; provides MEI update in 2010 to replace a 21% cut; for 2011, two new targets: (i) E&M and preventive services (GDP +2); and (ii) all other services (GDP +1). Excludes cost of physician-administered drugs and lab services from new targets; re-sets new targets after five years to help reduce the likelihood of future steep cuts. (H.R. 3961)	Medicare update is 0.5% in 2010, with cliff financing, in lieu of a 21% cut in January. Sec. 3101	The AMA supports the SGR provision in H.R. 3961. AMA policy does not support the SGR provision in H.R. 3590. AMA policy directs that health system reform legislation replace the SGR with a system that automatically keeps pace with the cost of running a practice and is backed by a fair, stable funding formula.
Medicare Commission	None	Establishes Independent Medicare Advisory Board (IMAB) to reduce Medicare payment updates for physicians and other providers under a new spending target system and fast track legislative approval process. The new Senate bill modifies the procedures for consideration of the Medicare Advisory Board recommendations, including provisions that would make it difficult for Congress to repeal or otherwise change Board recommendations or the process for Congressional consideration of Board recommendations via separate legislation. The bill also clarifies that the physician fee schedule would not qualify for an exemption from the Board's payment recommendations and provides that the Board may not submit payment recommendations if projected growth in national health expenditures exceeds projected Medicare growth. Sec. 3403	AMA policy opposes an independent Medicare commission under the current construct in H.R. 3590. This provision could subject physicians to another spending target, which could produce multiple payment cuts per year. In addition, for the first 4 years, it would wall off significant portions of the Medicare program from savings.
Medicare Enrollment	None	An enrollment application fee of \$200 for individual practitioners and \$500 for institutional providers and suppliers would be imposed to cover the costs of screening each time they re-verify their enrollment (every five years). Sec. 6401.	AMA policy does not support enrollment fees.

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Geographic Adjustment	<p>Requires Institute of Medicine study on Medicare GPCI accuracy; adds new funding to revise GPICs (\$4 billion for each of 2012 and 2103).</p> <p>Requires IOM geographic variation study, with recommendations on modifying physician/hospital payments based on quality/cost value index. Payment recommendations would be implemented unless disapproved by Congress before May 31, 2012., and would have to be budget neutral over 10-years. The new payment system likely would begin for physicians in 2014. Sec. 1157-1160</p>	<p>Modifies physician payments based on quality/cost index and on budget neutral basis – begins 2015 (based on 2014 performance.) By 2017, all physician payments must be subject to quality/cost payment modifications. Sec. 3007</p> <p>Provides new money for 2010/2011 practice expense GPCI adjustments to help payment areas with PE GPICs less than 1.0. Based on the results of an HHS PE GPCI study, PE GPICs adjustments would be implemented by 2012 in a budget neutral manner</p>	<p>AMA policy opposes redistributing Medicare payments among providers based on outcomes, quality, and risk adjustment measurements that are not scientifically valid, verifiable, and accurate.</p> <p>AMA policy supports GPCI revisions with new money. In lieu of the Senate provision and self-implementation provision in the House bill, the AMA would prefer a geographic variation study as well as funding for the transparent development and testing of measures that recognize necessary components of agreed upon risk adjustment and attribution models that would be most useful for addressing geographic and quality of care variations.</p>
Physician Resource Use	<p>Expands current physician resource use program by requiring physician resource use reports to be disseminated to increasing numbers of physicians “in a significant manner in the regions and cities of the country with the highest utilization” of Medicare services beginning in 2012, so that “during 2014 and subsequent years, reports are disseminated at least to physicians with utilization rates among the highest 5 percent” nationally. Details of the nature of the reports to be publicly available (it seems as of January 1, 2012). Sec. 1121</p>	<p>Expands the Medicare physician feedback program based on episode-grouper methodology developed by 2012. Secretary must make methodology publicly available and seek endorsement of methodology through NQF. Beginning in 2012, Secretary to provide reports to physicians comparing physicians’ patterns of resource use to other physicians. Public reporting of aggregate reports for MDs and DOs.</p> <p>As a result of AMA advocacy efforts, the new Senate bill removes the 5% outlier penalty that was in the SFC bill. (The penalty would have applied to outlier physicians at/above 90th percentile of national utilization beginning in 2014.)</p>	<p>AMA policy supports removal of the 5% outlier penalty in the Senate bill. The AMA recommends that appropriate funding be allocated to CMS to help construct a fair and workable system while expanding the physician feedback program, as required under both bills.</p> <p>The House provision should clarify: (i) that public reports should not contain details about individual physicians’ resource use; and (ii) whether utilization is “per capita” and “per episode.”</p>
Physician Quality Reporting	<p>Requires timely feedback and appeals process regarding successful PQRI participation; PQRI bonuses (2%) extended through 2012. Sec. 1124</p>	<p>PQRI provisions in the Senate Finance Committee bill (SFC) and new Senate bill that are the same include: timely feedback requirement, with informal appeals process by</p>	<p>The PQRI improvements in both bills are those recommended by the AMA. The AMA also supports the bonus payments, which are consistent with AMA policy. AMA policy</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Initiative (PQRI)		<p>2011. Also, beginning in 2012, Secretary would develop a plan to integrate quality measure reporting with EHR meaningful use reporting requirements.</p> <p>Senate Finance Committee (SFC) bill provided PQRI bonus for 2011 (1%) and 2012 (0.5%); under new Senate bill, PQRI bonuses are extended an additional 2 years (0.5% for 2013 and 2014), totaling 4 years of PQRI bonuses.</p> <p>SFC bill provided PQRI penalties for unsuccessful participation beginning in 2013 (1.5%) and thereafter (2%). Under new Senate bill, these penalties are delayed 2 years and will begin to apply in 2015 (1.5%) and thereafter (2%);</p> <p>SFC bill provided a new PQRI option beginning in 2011 -- physicians can qualify for maintenance of certification (MOC) or equivalent program and complete MOC practice assessment. Under the new Senate bill, beginning in 2011, physicians could submit data to the HHS Secretary through an MOC program, but the new Senate bill modifies this provision slightly by giving the Secretary more discretion in establishing the MOC program. Sec. 3002</p>	opposes the penalties in H.R. 3590.
Quality Improvement Initiatives/ CMS Innovation Center	Provides additional resources for development of national priorities for performance improvement and quality measures, development/dissemination of “best practices, evaluation of data collection processes, and Medicare shared decision making demonstration.	Provides additional resources for development of national strategy and priorities for performance improvement and development/dissemination of quality measures, development/dissemination of best practices, data aggregation. The new Senate bill also extends these provisions to include public reporting of performance for	The AMA is generally supportive of provisions in both bills that add resources for quality improvement processes. The AMA is working with the Stand for Quality group to ensure provisions reflect appropriate Secretarial discretion, public/private cooperation, and public reporting protections. The AMA is concerned about the public reporting provisions

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>Creates a Center for Medicare & Medicaid Payment Innovation (CMI) within CMS not later than 2011 to test and expand new innovative payment and service delivery models that encourage higher quality and lower cost. Initially, in testing a model, the design would not have to ensure that the model is budget neutral with respect to program spending. The Secretary could expand the duration and scope of a model, including nationwide if the model meets certain criteria set forth in the bill. Sec. 1441-1445 and 2401</p>	<p>quality measures that is “provider-specific and sufficiently disaggregated and specific to meet the needs of patients.” This provision is based on provisions in the Senate HELP Committee bill, which would have required public reporting within 5 years of enactment. The provisions in the Senate bill do not have an effective date and thus the Secretary has the discretion to determine the timeline for public reporting. The new Senate bill also provides additional resources for grants for shared decision making programs in federal programs. Sec. 3011-3015 and Sec. 3501</p> <p>Establishes CMS Innovation Center by 2011 to test care models that improve quality and slow Medicare cost growth rate, including programs that promote greater efficiencies and timely access to outpatient services (such as physical therapy) through models that do not require a physician or other health professional to refer the service or be involved in establishing the plan of care. The Secretary can expand the duration and scope of a model, including nationwide. Secretary to make public evaluation of each model, including quality of care furnished under the model. Sec. 3021</p>	<p>in the Senate bill given problems with the existing PQRI. The AMA supports public reporting when implemented with appropriate safeguards, especially regarding appropriate risk-adjustment, correctly attributing care to those involved in the care, and ensuring accurate, user-friendly, and relevant information that is helpful to consumer/patients, physicians and other stakeholders.</p> <p>The CMS Innovation Center can work for or against physicians, depending on what models the Secretary develops and how they are implemented. It could also lead to scope of practice issues, and AMA policy does not support expansion of scope of practice for non-physician practitioners.</p>
Primary Care Bonus	<p>As of 2011, 5% bonus for primary care if 50% of billings are for certain primary care services (bonus is 10% if the practitioner predominantly provides services in a primary care health professional shortage area). Sec. 1303</p>	<p>For 5 years (2011 through 2015), provides 10% bonus for primary care practitioners if the primary care services account for at least 60% of allowed Medicare charges (and general surgeons in health professional shortage areas); 1/2 of bonuses funded by 0.5% reduction in Medicare payments for all other services. Sec. 5501</p>	<p>The AMA supports primary care/general surgery bonus payments treated as a funded workforce investment that is not offset through a reduction in payments to other physicians. AMA policy opposes budget neutrality offsets.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Payment Bonus for Efficient Areas	For 2011 through 2013, provides 5% percent bonus for counties (or equivalent areas) in 5 th lowest percentile of utilization based on per capita Parts A and B spending (as standardized to eliminate GPCI payment adjustments). Sec. 1123	None	The AMA supports the House provision.
Payment for Imaging Services	Effective January 2011, for purposes of practice expense RVUs, increases utilization rate assumption from 50% to 75% for advanced diagnostic imaging equipment (i.e., nuclear medicine, including PET; MRI, CT, and others as specified by the Secretary in consultation with physician specialty organizations and other stakeholders); increases technical multiple imaging procedure payment reduction from 25% to 50%. Sec. 1146	Increases utilization rate assumption for advanced imaging equipment from 50% to 65% for 2010 through 2012, 70% in 2013, and 75% in 2014 and thereafter; advanced diagnostic imaging includes (i) diagnostic MRI, CT, and nuclear medicine (including PET); and (ii) such other diagnostic imaging services (excluding X-ray, ultrasound, and fluoroscopy), as specified by the Secretary in consultation with physician specialty organizations and other stakeholders. (Under the SFC bill, the 75% assumption was effective for 2013 and thereafter). Beginning July 1, 2010 increases technical multiple imaging procedure payment reduction from 25% to 50%. (Under the SFC bill, this provision would have been effective January 1, 2010.) Sec. 3135	The AMA believes the provisions in both bills are too broad, and should allow medical specialties that represent users of the various imaging modalities to submit data to CMS to determine an appropriate assumption for utilization. This provision should override recent regulatory changes to the utilization rate announced under the final physician fee schedule rule for 2010. AMA policy does not support the multiple procedure payment reduction.
Accountable Care Organization	Establishes 3-5 year Medicare ACO pilot program for physicians and other providers to share in cost savings. ACOs could be a group of physicians and may, but are not required to, include a hospital. The Secretary could extend and permanently implement certain ACO models on a large scale basis. Sec. 1301	Beginning in 2012, the Secretary would establish Medicare shared savings programs (ACOs) for various providers, including groups of physicians, to share in savings. ACOs would have to be formed for at least 3 years and shall have at least 5,000 beneficiaries assigned to it. Sec. 3022	The AMA generally supports ACOs that provide for voluntary participation, but have expressed some structural concerns, including physician financial risk for ACO patients that seek care from other physicians and providers. AMA policy supports implementing successful models under the pilot program on a broad-scale basis, as provided in the House bill.
Medical Home Pilot Program	Establishes a voluntary medical home pilot program, led by primary care physicians, principal physicians, or nurse practitioners. The Secretary could extend and permanently implement certain medical home models on a	Establishes an independence at home demonstration program to bring primary care services to the highest cost Medicare beneficiaries with multiple chronic conditions in their home. Health teams could be eligible	AMA policy supports testing medical home models and implementing beneficial models on a broad-scale basis upon a thorough evaluation, as provided for in the House bill. Consistent with AMA scope of practice policy, the AMA

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>large scale basis. Sec. 1302</p> <p>Also establishes an “independence at home pilot program” to bring primary care services to high cost Medicare beneficiaries with multiple chronic conditions in their home. Health teams could be eligible for shared savings if they achieve quality outcomes and cost savings. Sec. 1312</p>	<p>for shared savings if they achieve quality outcomes, patient satisfaction, and cost savings. NPs and PAs could lead the home-based primary care team as part of as independence at home medical practice. Sec. 3024</p>	<p>does not support any provision in the bill that would expand the scope of practice for non-physician practitioners, and believes that medical homes should be led by physicians.</p> <p>The AMA generally supports testing independence at home medical models, as provided for in the Senate bill, but have some structural concerns, including that the demonstration program should be led by physicians.</p>
Misvalued Codes Under Physician Fee Schedule	<p>Requires Secretary to identify/adjust RVUs for potentially misvalued CPT codes, and the Secretary may use existing processes for recommendations on review/adjustment. The Secretary would also establish a process to validate RVUs, and may use exiting processes to do so. Sec. 1122</p>	<p>Requires Secretary to identify/adjust RVUs for potentially misvalued CPT codes, and the Secretary may use existing processes for recommendations on review/adjustment. The Secretary would also establish a process to validate RVUs, and may use exiting processes to do so, and shall make adjustments to work RVUs. Sec. 3134</p>	<p>This provision is unnecessary since it likely would duplicate ongoing efforts already undertaken by the AMA/Specialty Society RVS Update Committee (RUC) to review and adjust potentially over-valued codes.</p> <p>The AMA is concerned about repeal of Section 4505(d) of the Balanced Budget Act of 1997. While this provision includes obsolete requirements that could be repealed, it also includes important requirements specifying that actual and valid data are used in determining practice expense relative value units and specifying that physician organizations are consulted about methodology and data to be used in developing these relative values. This provision should be retained in law.</p>
Physician-Owned Hospitals	<p>Ban on new physician-owned hospital in Medicare. For current hospitals, level of physician ownership and investment in the aggregate could not increase, and there are limits on operating rooms, procedure rooms, expansion of beds, and new disclosure requirements.</p> <p>Manager’s amendment would allow existing</p>	<p>Ban on new physician-owned hospitals in Medicare. For current hospitals, level of physician ownership and investment in the aggregate could not increase, and there are limits on expansions of beds, operating rooms, procedure rooms, and new disclosure requirements. Under the new Senate bill, current hospitals must have a provider agreement in effect as of February 1, 2010</p>	<p>AMA policy supports the disclosure of physician ownership and investment information.</p> <p>AMA policy opposes the proposal to eliminate the whole hospital exception to the Stark self-referral law.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	physician owned hospitals with high inpatient Medicaid admissions to apply for permission to grow. Sec. 1156	(this date was November 1, 2009 under the SFC bill). Sec. 6001	
Preventive Services	As of January 1, 2011, Medicare would eliminate co-insurance for covered preventive services. Sec. 1305	Provides incentives for use of preventive services; eliminates co-insurance; provides annual Medicare coverage of risk assessment and wellness visit and personalized prevention plan, with incentives for healthy lifestyles; no co-insurance. Sec. 4103, 4104	AMA policy supports the preventive services provisions.
Work GPCI	Extends work GPCI floor through 2011. Sec. 1194	Extends the work GPCI floor through 2010 (the SFC bill would have extended it through 2012). Sec. 3102	AMA policy supports the GPCI provisions.
Nurse Midwives	Increases Medicare payment rates for nurse-midwives from 65% to 100% of the Medicare physician fee schedule. Sec. 1304	Increases Medicare payment rates for nurse-midwives from 65% to 100% of the Medicare physician fee schedule. Sec. 3114	The AMA has strong concerns about this provision.
Medical Liability Reform (MLR)	<p>Establishes a grant program for States that have enacted and implemented certificate of merit and/or early offer alternative medical liability reform programs (alternative programs must be enacted after H.R. 3962 is signed into law). In addition, the bill indicates that these alternative programs may not include provisions that limit attorneys' fees or impose caps on damages. Also, includes a provision clarifying that this incentive program does not override existing or future state liability reform laws on caps or on limiting attorneys' fees. Sec. 2531</p> <p>Extends medical liability protection under the Federal Tort Claims Act (FTCA) to volunteer practitioners providing uncompensated services at federally qualified health centers. Sec. 2586</p> <p>Clarifies that certain provisions in the bill, relating to payment initiatives and delivery</p>	Sense of the Senate to encourage states through demonstration programs to evaluate alternatives to the current medical liability system. Sec. 6801	<p>Consistent with AMA policy, H.R. 3962 would authorize federal grants for states to pursue alternative liability programs, and would provide medical liability protections to those physicians who provide volunteer medical services at federally qualified health centers.</p> <p>The provision in H.R. 3962 that clarifies that certain provisions in the bill (i.e., payment initiatives associated with hospital readmissions or health care acquired conditions, best practice guidelines) cannot be used to establish the standard of care owed in any medical liability action or claim is consistent with AMA policy. The savings clause in H.R. 3962 requires further clarification.</p> <p>As a result of AMA advocacy, the Agency for Healthcare Quality and Research has established a grant program to fund pilots of alternative medical liability reforms that is open to a broader array of initiatives than permitted in</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
	<p>system reform such as, reducing hospital readmissions, nonpayment for certain health care acquired conditions (HACs), prevention and wellness guidelines, and the Center for Quality Improvement, can not be used to establish the standard or duty of care owed by a physician (or a health care provider) to his/her patients in a medical liability claim or action. Includes a savings clause indicating that nothing in the bill is intended to override existing state laws governing legal standards or procedures used in medical liability cases or the ability of a state to enact or implement such state liability laws. Sec. 261</p>		<p>H.R. 3962.</p> <p>AMA policy supports medical liability reforms that reduce the cost of defensive medicine.</p>
Graduate Medical Education (GME)	<p>GME provisions would authorize: the re-distribution of unused GME positions to qualifying hospitals, with preference to hospitals that emphasize primary care training; more flexibility in the GME program; and preservation of resident cap positions from closed hospitals.</p> <p>Includes a provision that would require the Government Accountability Office (GAO) to assess and report on medical residency training programs, including curriculum requirements, and assessment of faculty expertise and the accreditation processes. Sec. 1501-1505</p>	<p>GME proposal would authorize re-distribution of current unused GME residency slots to qualifying hospitals to address physician shortages in rural and other underserved areas, especially in the areas of primary care and general surgery. Also includes provisions that would provide more flexibility in the GME program to allow for training in outpatient settings and would preserve GME positions from closed hospitals based on certain criteria. Also authorizes qualified teaching hospitals to be eligible for GME payments and would allow for teaching health centers development grants to enable newly accredited or to expand primary care medical residency programs meeting certain criteria. Sec. 5503-5506 and 5508</p> <p>Also would establish a graduate nurse education demonstration program in Medicare. Sec. 5509</p>	<p>To address physician shortages, AMA policy supports advocating for adequate funding for graduate medical education (GME) and increasing GME positions for undersupplied specialties and underserved areas.</p> <p>Consistent with AMA policy, both bills include provisions that would re-distribute unused GME positions to qualifying hospitals to address physician shortages. Both bills would also provide more flexibility in the GME program to allow for training in outpatient settings, and would preserve GME positions from closed hospitals based on certain criteria.</p> <p>To address physician shortages, AMA policy supports lifting the cap on Medicare supported GME positions in undersupplied specialties and underserved areas to increase residency positions, which is absent from both bills.</p> <p>The provision in H.R. 3962 that would require a Government Accountability Office (GAO) study</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
			and report on medical residency training programs, including curriculum requirements, is inconsistent with AMA policy.
Health Care Workforce	<p>Workforce provisions authorize: funding for the National Health Service Corps (NHSC) to address workforce shortages in high need areas; the creation of a Frontline loan repayment program for eligible primary care physicians and other health professionals who do not qualify to participate in the NHSC; part-time service to qualify towards the NHSC service requirement; increasing of the annual NHSC loan repayment amount from \$35,000 to \$50,000; funding for Title VII health professions and diversity programs; establishment of a public health workforce corps similar to the NHSC to address public health workforce shortages; funding for nurse education and training programs; funding for nurse-managed health centers; grants for promoting interdisciplinary and community-based training; and the establishment of an advisory committee and study center to assess health care workforce needs. Also requires the Government Accountability Office (GAO) to conduct a study on the effectiveness of scholarships and loan repayments offered through both the NHSC and the Frontline Health Provider Loan Repayment Program. Sec. 2201-2281 and 2512</p>	<p>Workforce provisions authorize: the establishment of a National Health Care Workforce Commission to provide recommendations to Congress on health care workforce needs; authorization for state workforce development grants; increased funding for the National Health Service Corps (NHSC) scholarship and loan repayment program (up to \$1.15 billion in FY 2015), funding for Title VII health professions and diversity programs and Title VIII nurse education and training programs; easing of current criteria for schools and students to qualify for primary care student loans; the establishment of a loan repayment program for pediatric subspecialists and mental and behavioral health service providers working in underserved areas; the creation of a Ready Reserve Corps for service in times of national emergency; authorization of funding for new training opportunities for direct care workers providing long-term care services; expansion of the geriatric academic career awards under Title VII to advanced practice nurses and other health care professionals; the creation of a grant program to support nurse-managed health clinics; authorization for mental and behavioral health education and training grants; reauthorization and expansion of programs to support model curricula for cultural competency, prevention, and public health proficiency; grants to promote the community health workforce; addressing of workforce shortages in state and local health</p>	<p>Consistent with AMA policy, provisions in both bills would authorize funding for existing scholarship, loan repayment, and training programs like the National Health Service Corps (NHSC) and Title VII health professions and diversity programs in order to address the need for more physicians and other health care professionals.</p> <p>Consistent with AMA policy, provisions in H.R. 3962 would provide more flexibility in the NHSC by allowing for part-time service and would increase the annual NHSC loan repayment amount from \$35,000 to \$50,000.</p> <p>The AMA does not support imposing limits on the number of physicians and health educational professionals to be appointed to the national health care workforce commissions.</p> <p>AMA policy supports fully integrated multidisciplinary health care teams that are comprised of nurses and other health care professionals, which are led by physicians to ensure that patients get the best possible care.</p> <p>The AMA supports the expansion of Title VII geriatric career incentive and academic career awards program being extended to other relevant physician specialists, and that all expansions occur with additional, not existing, funding.</p> <p>AMA policy supports the restoration of the economic hardship student loan deferment</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
		<p>departments in applied public health epidemiology and public health science; and the establishment of a primary care extension program to educate and provide technical assistance to primary care providers about evidence-based therapies, preventive medicine, health promotion, chronic disease management, and mental health. Sec. 5001-5405</p> <p>The Senate bill would also provide funding to support pilot projects that design, implement, and evaluate models of regionalized emergency care and trauma systems. In addition, would authorize grants to trauma centers in underserved areas. Sec. 3504-3505</p>	<p>program known as the 20/220 pathway that a majority of medical residents could qualify for, which was included in the Senate HELP Committee bill, S. 1679.</p>
Administrative Simplification	<p>Authorizes funding for the Secretary of HHS to adopt certain HIPAA transaction and code set standards such as claims attachments and electronic funds transfers (EFT), and to adopt operating rules for using and processing electronic health care transactions.</p> <p>In addition, requires the Secretary of HHS to adopt a single, binding, uniform companion guide, including operating rules, for each of the standards for version 5010 (version 5010 is the updated version of the HIPAA electronic transactions required for use by physicians and others on January 1, 2012). Also requires the adoption of uniform claim edits, uniform reason and remark denial codes, unique health plan identifier, standards for first report of injury, and an electronic funds transfer (EFT) standard which must be adopted and implemented prior to mandating the use of EFTs by January 1, 2015 under</p>	<p>Requires the Secretary to adopt a single set of operating rules, recommended by a qualifying non-profit entity, for electronic transactions like eligibility verification, claims status, claims remittance/payment, claims attachments, as well as a rule to establish an electronic funds transfers (EFT) standard, within specified periods of time. Also requires the Secretary to adopt the development of a unique health plan identifier and the mandated use of EFT under Medicare by January 1, 2014. Health plans are required to certify compliance with standards and operating rules and would be subject to penalties for noncompliance. Sec. 1104</p>	<p>AMA policy supports streamlining and standardizing insurance claims processing requirements to eliminate unnecessary costs and administrative burdens.</p> <p>While the administrative simplification provision in H.R. 3590 attempts to achieve this goal, the AMA supports additional essential elements, including the adoption of a single, binding, uniform companion guide (not just operating rules), for each of the standards for version 5010 (version 5010 is the updated version of the HIPAA electronic transactions required for use by physicians and others on January 1, 2012).</p> <p>The administrative simplification provisions in H.R. 3962 are consistent with AMA's recommendations, especially: (1) the requirement that the Secretary of HHS adopt a single, binding, uniform companion guide,</p>

	<p>Medicare. Authorizes the Secretary of HHS to establish an annual audit and certification process to ensure that health plans are compliant with all the standard transactions. Sec. 115</p>		<p>including operating rules, for each of the standards for version 5010, and the requirement to consult with a nonprofit entity that meets the requirements specified in H.R. 3962; (2) the requirement for the adoption of additional standards such as uniform claim edits, uniform reason and remark denial codes, unique health plan identifier, standards for first report of injury, and clarification that an electronic funds transfer (EFT) standard must be adopted and implemented prior to mandating the use of EFTs by January 1, 2015 under Medicare; (3) defined terms such as “code set” and “operating rules” in accordance with AMA’s recommendations, and (4) the authorization for the Secretary of HHS to establish an annual audit and certification process to ensure that health plans are compliant with all the standard transactions and authorization of concurrent State enforcement jurisdiction.</p> <p>In order to fully realize the cost savings associated with administrative simplification, the AMA supports these additional administrative simplification requirements: (1) the adoption and use of a single, mandated ICD-9 CM to ICD-10 CM and ICD-10 PCS cross walk, which must be effective October 1, 2013, and which must be available publicly without charge; (2) the adoption and use of binding operational guidelines and instructions for each of the standards code sets; (3) the adoption and use of uniform payment rules; and (4) definitions for other critical terms such as “companion guide” and “standard” in accordance with AMA’s recommended language to avoid multiple interpretations.</p>

Issue	House of Representatives HSR Bill H.R. 3962 Affordable Health Care for America Act	Senate HSR Bill H.R. 3590 Patient Protection and Affordable Care Act	AMA Policy and Comments
Antitrust Reform	Eliminates the federal antitrust exemption under the McCarran-Ferguson Act for health insurers and medical liability carriers. Sec. 262	No provision.	AMA policy supports the inclusion of provisions that would provide antitrust relief for physicians: reforms that provide relief from legal and regulatory impediments to physician collaboration; allow for groups of physicians to effectively reengineer their practices to improve care coordination and quality; allow greater clinical integration of physician practices to enable care coordination and quality improvements for all patients.
Cosmetic Surgery Excise Tax	None	Imposes five percent excise tax on elective cosmetic surgical and medical procedures performed by a licensed medical professional collected at point of service which is estimated to generate \$ 5 billion. Excluded are elective cosmetic surgical and medical procedures that are "necessary to ameliorate a deformity arising from, or directly related to, a congenital abnormality, a personal injury resulting from an accident or trauma, or disfiguring disease." Every person receiving a payment for procedures on which a tax is imposed must collect the amount of the tax from the individual on whom the procedure is performed and remit such tax quarterly to the Secretary at such time and in such manner as provided by the Secretary. However, where any tax is not paid at the time payments for cosmetic surgery and medical procedures are made, then the tax must be paid by the person who performs the procedure. Sec. 9017	AMA policy opposes the imposition of a selective revenue tax on physicians and other health care providers.
